

# WILDLIFE X-POSURE

## WILD KIDZ VIDZ ACTIVITY SHEET

### FROGS

---

\* **“Go cleaner, go greener”**. What did you learn about frogs from the video that makes that little slogan meaningful? Can you write a short letter to a friend explaining what it means? (Remember Xavier called them an INDICATOR species)

---

---

---

---

\* Frogs are classified as AMPHIBIANS, so some of their unique features are

---

---

---

\* How many species of frogs are there in the world? \_\_\_\_\_

\* How many species of frogs do we have in Australia? \_\_\_\_\_

\* Can you name some of the species Xavier showed you in the video?

\_\_\_\_\_

\* Which one did you like? \_\_\_\_\_

\* Have you ever held a frog? Do you think frogs feel slimy?

\_\_\_\_\_

\* Frogs have some great ADAPTATIONS for their environments. Can you remember some that were mentioned?

Tree frogs are called ABOREAL (tree dwelling) and have

\_\_\_\_\_ that help them \_\_\_\_\_

Frogs come in all different colours and patterns that help them

\_\_\_\_\_

This is known as C\_\_M\_\_U\_\_L\_\_G\_\_.

\* Swamp frogs are not aboreal, but like to

\_\_\_\_\_

\* All frogs are CARNIVOROUS which means they eat  
\_\_\_\_\_ for example \_\_\_\_\_

\* They have some unusual ways of catching and swallowing their food. How do their EYES help them swallow?

\_\_\_\_\_

\* Sadly many species of frogs are now "ENDANGERED". What does that mean?

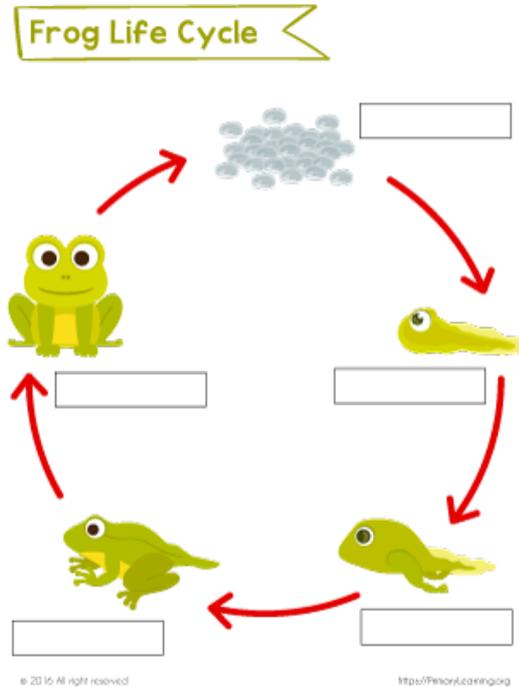

\_\_\_\_\_

\* Frogs are also night hunters, meaning they are classed as N\_\_C\_\_U\_\_N\_\_L.

\* Only the \_\_\_\_\_ frogs croak and the loudest and fittest attract a mate.

\* Now here is something every kid should have seen in a puddle ..... TADPOLES.

Can you label a FROG LIFE CYCLE? Colour the frog pond and add some tadpoles in the water, because they can only live **IN** the water, unlike the adult frogs with LUNGS to breathe on the land.

TONGUE TWISTER CHALLENGE: Can you make up a frog tongue twister to test your friends? Maybe you could use Mr. Pobblebonk Frog.
